The BookTest suite within the prototype.library module has successfully passed all its tests, demonstrating its reliability and correctness. Specifically, two tests were executed: addCopyTest() and removeCopyTest(). The addCopyTest(), which verifies the functionality of adding a copy of a book to the library, completed in 0.004 seconds, while the removeCopyTest(), which checks the removal process of a book copy, took 0.031 seconds. There were no failures or ignored tests, and the entire test suite ran in a total duration of 0.035 seconds.

The CustomerTest suite within the prototype.library module has demonstrated complete success, confirming the robustness of the customer-related functionalities. This suite includes two tests: borrowCopyTest() and returnCopyTest(). The borrowCopyTest(), which validates the process of a customer borrowing a copy of a book, executed in 0.002 seconds. The returnCopyTest(), assessing the procedure for returning a borrowed book, took 0.037 seconds to complete. With no failures or ignored tests, the entire suite concluded in a brief 0.039 seconds.
